Tools Guide — 10 Tools and Resources

V101 · 21 November 2026 · English edition

The Statistical Leaders tool currently publishes 10 season-to-date Top 3 rankings through matchweek 11. There is no automatic data feed. This guide explains how to use every listed control and how to interpret the results.

06 Player Comparison

Compare two players in raw totals or per-90-minute metrics, with editable data.

1. Select Player A and Player B, then switch between Totals and Per 90 minutes.
2. Swap players if desired; export the pair comparison as CSV.
3. Open the player editor to adjust matches, minutes, goals, assists and verified sources.
4. Import a compatible CSV or export the complete dataset; reset to restore original data.

Results and limitations: Initial dataset is a dated snapshot; imported or edited records are not independently verified.

07 Team Valuation — Football Finance Comparison

Compare 13 reported accounting indicators across two years for three Portuguese football SADs.

1. Choose Club/SAD A and Season A, then Club/SAD B and Season B.
2. Select a measure to update comparison charts and historical bars.
3. Review the full table, cited sources and differences between individual and consolidated reporting.
4. Optionally enter your own hypothetical squad market values; these are not sourced market prices.
5. Press the blue Export CSV button in the hero or Download comparison CSV inside the dashboard; Restore selection resets the controls.

Results and limitations: UTF-8 CSV of selected data and labelled hypothetical scenarios. Historical annual reporting, not live data.

08 Squad Market Values — 91 Players

Filter documented market value estimates for 91 players at the three major clubs.

1. Filter by club or leave All three clubs selected.
2. Use player search and position filters to narrow the dataset.
3. Choose the sort order and review the filtered Top 10, table and totals.
4. Press Export visible players CSV to download the current selection.
5. Check for updates queries a licensed feed only if configured; otherwise the dated snapshot remains.

Results and limitations: External market estimates, not actual transfer prices or accounting carrying values; no automatic feed currently connected.

09 Statistical Leaders — 10 published metrics

Compare the Top 3 players in ten Liga Portugal Betclic 2026/27 metrics. The rankings represent season-to-date figures through matchweek 11 (8 November 2026; 98 matches completed), not matchweek-only results. Editorially reviewed on 21 November 2026.

1. Open the Statistical Leaders page and select one of the ten metrics using the Metric menu.
2. Read the three displayed player cards: position, player, club and statistical value. Figures refer to the season total.
3. Check the named data provider, editorial review date, methodology and notes on tied positions before comparing players.
4. Use “Reload published data” to retrieve the website’s existing JSON snapshot again. It does not fetch new results from Liga Portugal or RealLeader.
5. Use the JSON or CSV download links at the bottom of the tool to inspect the published snapshot.

Metric definitions / data sources

Goals — Goals scored in Liga Portugal Betclic. [Liga Portugal]

Assists — Assists as credited by Liga Portugal; totals may differ between data providers. [Liga Portugal]

Shots on target — Shots on target as counted by the stated source. [RealLeader]

Tackles — Tackles counted by RealLeader. Joint second place. [RealLeader]

Interceptions — The three players share 1st place with 22 interceptions each. [RealLeader]

Key passes — Pass directly leading to a shot (different from an assist). [RealLeader]

Successful dribbles — Successful dribbles counted by RealLeader. [RealLeader]

RealLeader average rating — RealLeader mean match rating with at least 45 minutes per qualifying game and at least 7 matches. Not GoalPoint Rating. [RealLeader]

Goalkeeper saves (RealLeader) — Saves counted by RealLeader. These values differ from Liga Portugal's "Defesas Completas" and should not be compared directly. [RealLeader]

Yellow cards — Yellow cards counted by RealLeader; suspensions are not inferred from this total. [RealLeader]

Sources: Liga Portugal and RealLeader. Updated manually after editorial verification; reloading JSON does not create new statistics.

Results and limitations: Data sources: Liga Portugal for goals and assists; RealLeader for the other eight indicators. Statistical definitions may differ, especially goalkeeper saves and average ratings. Ties are explicitly identified. Values are NOT automatically refreshed; editorial verification and a new site deployment are required after a matchweek. We will expand towards 15 metrics only when additional trustworthy Top 3 rankings are available.

10 Matchweek X-ray — Guided Analysis

Editorial reference resource rather than a form-based tool: navigate published matchweeks and CSVs.

1. Open the Matchweek X-ray page (currently in Portuguese) and select a published edition.
2. Distinguish sourced match facts from editorial interpretation and future watchpoints.
3. Follow the Tactical Observatory link for interactive analysis.
4. Download the edition CSV when provided and inspect the stated sample and sources.

Results and limitations: Editorial reading and downloads; this resource is currently Portuguese-only and does not provide interactive simulations.
